# Coronavirus Standards Working Group Meeting Summary

Dear Colleagues –

Thanks to Lili Wang of NIST for a great talk describing why serological assays matter, and the innovations of the team she is leading at NIST to put those assays on a solid metrological basis. Lili's slides are [linked here](#), and I'm grateful that several of the members at the meeting asked for them.

Our meeting was recorded, and the recording can be viewed at [this link](#).

Robyn Temple-Smolkin let us know that the [results of the August 2020 AMP Nationwide Molecular Testing Survey](#) have been released, and invited all to attend an AMP Virtual Town Hall meeting on 27 October at 1400 ET. Registration is open and free for this "[AMP COVID-19 Virtual Town Hall: Lessons Learned Since April](#)."

We've had a number of responses to our survey questions about participating in our Harmonization Study from a number of members and affiliates of members. We'll have a meeting next week to discuss the inventory of candidate materials and measurement participants, and plan our next steps toward a study. I am targeting 0800 PT on Tuesday 13 October, and will send an invite out today. Please respond with your availability; if we can't get critical mass, we'll find an alternate time.

Cheers and best regards!

Marc
